

James Masangcay

Backend Developer

Goa, P05 4422 4422

jameskyurem@gmail.com

+63 930 207 7586

Experienced Senior Full Stack Developer with a strong specialization in Laravel and PHP, delivering scalable, secure, and high-performance web applications across diverse industries. With a proven track record in backend architecture, API development, and frontend integration, I bring end-to-end technical expertise that bridges user experience with robust system functionality.

Skilled in Laravel, Vue.js, JavaScript, MySQL, and RESTful APIs, I've led development for enterprise platforms, logistics systems, and data-driven applications. I thrive in collaborative environments, consistently driving innovation, optimizing performance, and mentoring junior developers. Whether building real-time cargo tracking tools or architecting modular systems for enterprise clients, I combine technical precision with creative problem-solving to deliver impactful digital solutions.

Work Experience

Senior Backend Developer / PHP / Laravel

EMAPTA-Manila

February 2024 to Present

As a Senior Laravel Developer at Emapta, I worked for their client Custodia, I lead the development of scalable, secure, and high-performance web applications tailored to enterprise needs. My role bridges backend architecture and frontend integration, ensuring seamless user experiences and robust system functionality.

Senior Backend Developer / PHP / Laravel

30k Ft AU-Manila

February 2023 to February 2024

At 30K FT, a forward-thinking cargo tracking company, I serve as a Senior Backend Developer focused on building resilient, scalable systems that power real-time logistics and supply chain visibility. My work ensures that cargo data flows securely and efficiently across platforms, empowering clients with actionable insights.

Web Developer

ARCANYs-Cebu City, Cebu

February 2022 to February 2023

At Arcanys, I work for their client Censeo.ch, a Swiss-based financial services company, I serve as a Senior Backend Developer focused on building secure, scalable systems that support mortgage financing, financial planning, and client advisory workflows. My work ensures seamless data handling, compliance with financial regulations, and integration with third-party banking and insurance APIs.

Senior Full Stack Developer

Summit Media Publishing-Philippines

February 2021 to February 2022

At Summit Media, a leading media publishing company, I led a solo development project focused on streamlining internal workflows and automating day-to-day operational tasks. My work empowered editorial, marketing, and administrative teams with custom-built tools that improved efficiency, data accuracy, and cross-department collaboration.

Mid Web Developer

VeritasPay Philippines Inc.

July 2020 to February 2021

At VeritasPay, a leading fintech company specializing in payment processing and merchant solutions, I worked as a Mid-Level Web Developer focused on building and maintaining secure, scalable web applications. My role involved developing internal tools and client-facing platforms using C#.NET and Angular, ensuring smooth transaction workflows and system reliability.

Mid Web Developer

Spark Global Tech Solutions

February 2020 to July 2020

At Spark Global Tech, I worked as a Mid-Level Web Developer specializing in Laravel-based applications. I contributed to the development of custom software solutions for clients across various industries, while also supporting junior developers through code reviews, technical guidance, and collaborative problem-solving.

Web Developer

iConnect Guam

February 2019 to February 2020

At iConnect Guam, a remittance and telecom company, I worked as a Junior Web Developer supporting the development and maintenance of internal systems used for transaction processing, customer management, and reporting. I contributed to backend and frontend tasks, gaining hands-on experience in Laravel and PHP while collaborating with senior developers to deliver reliable financial tools.
